

# Jewellery Experience

I D E A S   M A D E   P R E C I O U S

## INSTRUCTIONS:

### **CAUTION - THE FINGER MEASURER ONLY FUNCTION CORRECTLY IF ALL STEPS ARE FOLLOWED CORRECTLY:**

1 - Before you print this file, make sure that the pages options ("reduce large pages" or "set role") are unchecked in the print setup.

2 - Print the file.

3 - To make sure that the finger measurer will work correctly, check with a ruler, if the space at the top of the page measures 3cm (The measurement has to be precise). If the measure is not found correct, check again if all the adjustment options are unchecked in the configuration pages, after this, print again.

4 - Take a ring that serves in the finger that you want to buy the new piece and place it on the circles on the next page. Check witch one the inner ring fits. When you find the corresponding circle, you will have the measurement of your finger.

5 - If you prefer, you can cut the strip beside the specified measure to confirm the extent, closing the strip on your finger. Or, if you do not have a ring to confirm the measurement ring, you can cut the strips and wrap around the finger to find witch measure coincides.

6 - If your measurement is less than **08** or more than **24**, please select the largest existing measure in the field "ring size" and send us the real measure through the field "Order Notes" that appears during purchase.

---

Check here if the space below measures 3cm
